

AWARENESS®

High Visibility Signage from Encon®

Visibility and accessibility of emergency shower and eyewash equipment is a critical component for a successful employee safety program. The AWARENESS® family of signs derives its name from our safety philosophy, cultivated from experience, and implemented in all of our designs.

AWARENESS® multi-directional signs are available in the original collection of durable and highly visible Yellow, Green, and Orange ABS plastic with multi-language options for our worldwide clientele. Options are available for top/bottom or mid-point water inlets.

AWARENESS 100™ is a compact design that fits most new and existing shower configurations. It incorporates a reflective strip for increased visibility, and utilizes universally recognized shower and eyewash icons. A two-piece 3D triangular shape makes it visible from multiple directions and allows for pipe or wall mount installation options.

AWARENESS 360™ is a radical departure in signage. It is designed for universal emergency shower applications, it provides maximum multi-directional visibility, and offers impact protection from dirt and debris to the shower head.

AWARENESS®

- Highly visible colors
- Durable corrosion-resistant plastic makes sign suitable for use in various types of indoor and outdoor applications
- 3-dimensional triangular shape
- Pipe or wall mount options
- Available for top/bottom or mid-point water inlet shower options

AWARENESS 100™

- Smaller design fits most shower configurations
- Plastic rivets snap into place for easy one-person installation
- Reflective strip to increase visibility
- Universally recognizable shower and eyewash icons
- Same notable and trusted characteristics of the original AWARENESS® sign:
 - Highly visible colors
 - Durable corrosion-resistant plastic makes sign suitable for use in various types of indoor and outdoor applications
 - 3-dimensional triangular shape
 - Pipe or wall mount options

AWARENESS 360°™

- Round design for multi-directional visibility
- Easy installation directly onto shower piping, no hardware needed
- For use on Therma-Flow® freeze-protected showers and most shower configurations
- Universally recognizable shower and eyewash icons
- Highly visible colors
- Durable corrosion-resistant plastic makes sign suitable for use in various types of indoor and outdoor applications
- Capable of withstanding high winds
