

Encon 500AFR™ Goggle

AFR = Advanced Fog Resistance

The new **Advanced Fog Resistance 500AFR™** chemical splash and impact goggle from Encon® is designed to offer superior protection where high heat, humidity, and rapid temperature changes demand it. The 500AFR™ offers the same high tech lightweight design combined with the exceptional chemical splash and impact protection you've come to expect from our 500 series goggles. The 500AFR™ improves upon the original with one of the most advanced premium anti-fog protective coatings in the industry and the addition of redesigned indirect ventilation channels on top and on both sides to provide maximum airflow. The 500AFR™ offers a cost-effective option for protection against chemical splash, dust, and flying particles and debris, now available with unequaled anti-fog protection for demanding work environments.

The 500AFR™ is tested to ANSI Z87.1+ and CSA Z94.3-2007. Conformity to ANSI Z87.1-2015 has been assessed per ANSI/ISEA 125-2014 Level 3.

PRODUCT FEATURES

- Premium coating resists fog longer
- Protects against chemical splash, dust and flying particles and debris
- Snug yet comfortable fit
- Fits over most prescription glasses
- QuickDraw® headband strap retainer for fast, efficient and secure fit adjustment

SPECIFICATIONS

- Indirect ventilation channels on top and on both sides provide airflow to resist fog
- AFR™ (Advanced Fog Resistance) Coating
- 99.9% UVA & UVB protection to 385Nm

CONFORMITY

- Conformity to ANSI Z87.1-2015 has been assessed per ANSI/ISEA 125-2014 Level 3
- ANSI Z87.1+
- CSA Z94.3-2007
